

## WLS-1717 Stainless Steel Food Pass Lock

### Recommended Specifications

The WLS-1717 series lock is used in high security applications for food pass doors, observation panels and other small doors in Governmental and Industrial buildings. The WLS-1717 series uses a paracentric cylinder and key.

The WLS-1717 is not recommended as a primary means of securing a full door or when dead latching is a requirement.

#### **Standard lock shall include:**

- High security and impact resistant
- 1/2" latch throw
- Latch size is 1-1/2" x 3/4"
- Lock case, cover and latch are constructed from cast stainless steel utilizing hardened brass key, cylinder and tumblers
- Lever tumblers are designed with 'anti-pick' notches for both the locked and unlocked positions
- Key-way depths are designed to impede of 'picking' of locks
- Key is made of bronze alloy and machined to fit smoothly into lock (sold separately)
- Lock is mounted with 4 security screws (included with lock)
- Standard handing is Right Hand (RH) for food pass.

**To specify fixture and accessories, use the Model Number and Options page.**

Example: To specify a food pass stainless steel lock, and keyed one side.

Use the following Willoughby Model Number:  
**WLS-1717-K1**

**WARNING:** Cancer and Reproductive Harm
