

WLS-DPS Series Magnetic Door Position Switch

Recommended Specifications

Application:

The WLS-DPS series magnetic door position switch is used to confirm that a door is closed, enhancing the accuracy of lock control systems. It ensures a door must be closed to signal a secure status or allow other doors to be unlocked. The DPS is essential for precise monitoring and control of door security, preventing compromises in system. A DPS must be combined with lock status switch (LSS) to ensure accuracy of open/closed status.

Standard unit shall include:

- Secure and impact resistant
- Stainless steel body
- Magnet with sensors

To specify fixture and accessories, use the Model Number and Options page.

Example: To specify a magnetic door position switch, magnetically actuated, mortise mounted

Use the following Willoughby Model Number:
WLS-DPS
