WLS-1710 Stainless Steel Food Pass Deadbolt Lock

Recommended Specifications

The WLS-1710 series deadbolt lock is used in high security applications for food pass doors, observation panels and other small doors in Governmental and Industrial buildings. The WLS-1710 series uses a paracentric cylinder and key.

The WLS-1710 is not recommended as the a primary means of securing a full door or when dead latching is a requirement.

Standard lock shall include:

- High security and impact resistant
- 5/8" bolt throw
- Deadbolt size is 1-1/2" x 3/4"
- Lock case, cover and latch are constructed from cast stainless steel utilizing hardened brass key, cylinder and tumblers
- Lever tumblers are designed with 'anti-pick' notches for both the locked and unlocked positions
- Key-way depths are designed to impede of 'picking' of locks
- Key is made of bronze alloy and machined to fit smoothly into lock (sold separately)
- Lock can be Surface Mounted with 4 security screws or Hollow Metal Flush Mounted with 7ga. Mounting Plate and 6 security screws (hardware included with lock)

To specify fixture and accessories, use the Model Number and Options page.

Example: To specify a stainless steel food pass deadbolt lock, keyed one side and left hand reverse.

Use the following Willoughby Model Number:
WLS-1710-K1-LHR
