

Willoughby Locking Systems

WLS-1717D Stainless Steel Food Pass Deadlatch Lock

Recommended Specifications

The WLS-1717D series deadlatch lock is used in high security applications for food pass doors, observation panels and other small doors in Governmental and Industrial buildings. The WLS-1717D series uses a paracentric cylinder and key or optional Mogul cylinder.

The WLS-1717D is not recommended as a primary means of securing a full door.

Deadlatch is design to disengage the latch bolt until the lock is unlocked with a key, to help prevent tampering.

Standard lock shall include:

- High security and impact resistant
- 1/2" latch throw
- Latch size is 1-1/2" x 3/4"
- Standard Deadlatch to provide disengaging of the latch bolt in a locked position
- Lock case, cover and latch are constructed from cast stainless steel utilizing hardened brass key, cylinder and tumblers
- Lever tumblers are designed with 'anti-pick' notches for both the locked and unlocked positions (paracentric applications)
- Key-way depth is designed to impede of 'picking' of locks
- Key is made of bronze alloy and machined to fit smoothly into lock (sold separately)
- Lock is mounted with (4) 5/16-18 x 1-3/4" security screws (included with lock)
- Standard handing for food pass applications.

To specify fixture and accessories, use the Model Number and Options page.

Example: To specify a food pass stainless steel deadlatch lock, with a mogul cylinder and keyed one side.

Use the following Willoughby Model Number:
WLS-1717DM-K1
