WLS-1730 Stainless Steel Mechanical Sliding Door Lock

Recommended Specifications

Application:

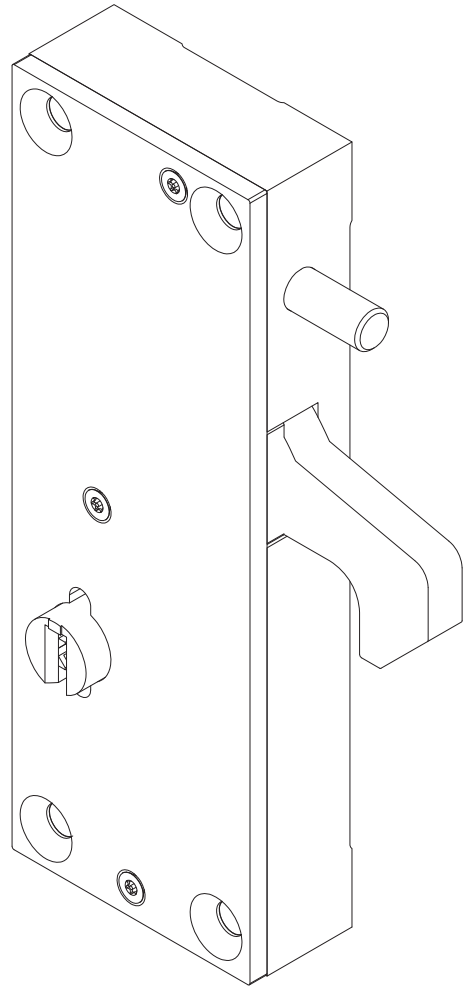

The WLS-1730 series lock is used for sliding door applications including medium and maximum inmate confinement, Governmental and Industrial buildings. The WLS-1730 series utilizes a standard paracentric type cylinder and key.

Standard lock shall include:

- High security and impact resistant
- Latch has a full 1-1/8" bolt throw with a 1/2" x 2-1/8" cross section
- Manual key unlock/relock
- Lock case and cover are constructed from 11 gauge stainless steel
- Lock case, cover and latch are constructed from cast stainless steel utilizing hardened brass key, cylinder and tumblers
- Lever tumblers are designed with 'anti-pick' notches for both the locked and unlocked positions
- Key-way depths are designed to impede 'picking' of locks
- Key is made of bronze alloy and machined to fit smoothly into lock (sold separately)
- Mounting hardware included, (4) 3/8-16 bolts

Optional Features:

- D - Deadlatch bolt
- BKD - Bolt keeper with dust box

To specify fixture and accessories, use the Model Number and Options page.

Example: To specify a stainless steel mechanical sliding door lock, keyed one side, left hand

Use the following Willoughby Model Number:
WLS-1730-K1-RH
